Conset 501-27 & 501-29

The Conset 501-27 and 501-29 have a light appearance but the construction is strong and solid with a 125kg lifting capacity. Both frames have an anti-squeeze protection system. If there is an obstruction whilst descending, the desk top will stop automatically when the pressure equals the combined weight of the desk top and items on it. The Conset 501-27 has the lowest height range available making it ideal for children and petite adults. The Conset 501-29 has the highest height range making it ideal for the taller user.

The Conset 501-27 desks have a shorter frame, allowing for desk tops of 60cm depths as well as 80cm.

Conset 501-27

Height range: 56-121cm (Conset 501-27) | 65-132 (Conset 501-29)

Height adjustment speed: 32mm/sec

Wood Finishes

The prices quoted are for desks finished in Melamine. If you would like an alternative finish there may be a surcharge. Please contact the office for prices.
