

Mod-V Height Adjustable Desks

Mod-V desks are some of the most flexible and adaptable desks on the market. Designed with function in mind, the aluminium and steel frame works provide many possibilities of workstation configurations. A choice of desk tops gives the end user the ability to personalise their desk.

The desks have excellent pre-set height adjustment, with the desk height set on delivery. To adjust the height of the desk, all items need to be removed from the desk top and then the legs are adjusted by removing several screws – ask for details.

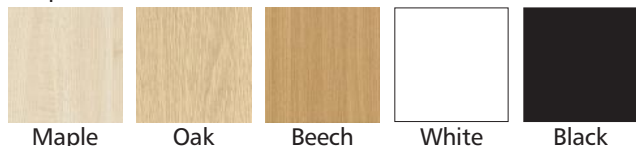

Height tailored to the user

Height range: (h) 62 - 82 cm

Wood Finishes

The prices quoted are for desks finished in Melamine. If you would like an alternative finish there may be a surcharge. Please contact the office for prices.
