

# Spira Plus

The Spira Plus chair is the evolution of the previous Spira chair which provides an economic office seating solution. With the unique design of having both adjustable pelvic and lumbar air support as well as a sculpted back and memory foam seat as standard the Spira Plus offers a good level of comfort.

### The Backrest

Available in 2 different sizes. The sculpted backrest offers a 'hug' like feel with greater lateral support.

### Inflatable Supports

Has both lumbar and pelvic adjustable air support as standard. The separate hand pumps adjust the amount of air to meet your requirements.

### The Seat

The seat is available in 2 sizes to make it easy to specify. Made with CMHR foam and covered with a memory foam wrap it offers a good level of comfort as standard.

### The Mechanism

This is synchronous, offering 20 degrees of recline and 5 degrees of forward tilt. There is also an independent back adjustment of 6 degrees.

High Back

## Our Opinion

- Offers a good economic solution
- Easy to specify as only two back and seat sizes available
- Offers a comfort level which you would expect from a more expensive chair

### Standard Features

- Independent back tilt adjustment
- Inflatable lumbar support
- Inflatable pelvic support
- Back height adjustment
- Seat height adjustment
- Sliding Seat
- Memory Foam Seat Wrap
