

BCS Freedom Desk

The BCS Freedom desk is a premium electrically height adjustable desk at a cost normally associated with entry-level electric desks. Designed exclusively for Back Care Solutions by a leading electric desk manufacturer, the BCS Freedom desk has a modern design with fantastic functionality.

The absence of a crossbeam provides spacious leg room, aids with pedestal storage and offers wheelchair access - whilst offering a 100kg weight capacity. The Freedom desk has a 3 tier column system which creates a fantastic height range of 63cm at its lowest and 123cm at its highest - making it ideal for almost any user.

- Height range: 63-123cm
- Height adjustment speed: 32mm/sec

Wood Finishes

The prices quoted are for desks finished in Melamine. If you would like an alternative finish there may be a surcharge. Please contact the office for prices.
